for Registrar General, India.

TODAY'S BEST INVESTMENT FOR SMALL SAVERS

NATIONAL SAVINGS CERTIFICATES

Available in three different series, maturing after 5, 7 and 12 years. The yield is 3%, 3.57% and 4.16% simple interest, respectively, at maturity. Thus, in the 12 year-certificates money increases by 50% on maturity. Interest is free of income-tax and super-tax and is not taken into account in arriving at the total taxable income.

The certificates are obtainable from Post Offices doing Savings Bank business in denominations of Rs. 5, 10, 50, 100, 500, 1,000 and 5,000. An individual can invest upto Rs. 25,000 and two joint holders upto Rs. 50,000/-.

3½%

TEN-YEAR TREASURY SAVINGS DEPOSITS

Deposits accepted in multiples of Rs. 100 upto a maximum of Rs. 25,000 for a single depositor and Rs. 50,000 for two persons jointly. Interest at 3½% per annum, free of income-tax and super-tax and which is not taken into account in assessing the total taxable income, is paid or remitted to the depositor's address every year. Deposits accepted at offices of the Reserve Bank of India at Bombay, Calcutta, Delhi and Madras and Branches of the Imperial Bank of India at other places transacting treasury business. Deposits are also accepted at all Treasuries in Part 'A' States at places where the Imperial Bank does not transact treasury business and at all Sub-Treasuries in Part 'A' States; also at Treasuries at Bhuj (Kutch), Imphal (Manipur) and Coorg-Mercara (Coorg).

For further information and/or rules governing these Investments please write to the Provincial National Savings Officer of your State or the National Savings Commissioner, Gorton Castle, Simla-3.

Births and deaths from principal diseases in towns with a population of over 30,000 in India for the week ending the 28th November, 1953.

Explanation of symbols used :—B.—Births ; B.R.—Birth Rate ; C.—Cholera ; S.—Smallpox ; P.—Plague ; F.—Fevers D.D.—Diarrhoea and Dysentery ; R.D.—Respiratory Diseases ; M.D.—Maternal Deaths ; D.R.—Death Rates ; I.D.—Infants Deaths (including in total deaths).

REMARKS

The figures of births and deaths shown in this statement for week ending the 28th November, 1953, relate to 133 towns with an estimated population of 14,738 thousands. The total number of towns is 296 and their population is 36,160 thousands. Thus 45% of the total number of towns representing 41% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 10,574 and 4,508 representing birth and death rates of 37.3 and 15.9 per thousand of population respectively.

(A) States (Parts A and C):—The data here relate to 101 towns with an estimated population of 11,060 thousands. Information about Bihar, Bombay Madras and West Bengal could not be included. The total number of towns is 250 and their population is 30,810 thousands. Thus 40% of the total number of towns representing 36% of the total population is covered. The numbers of births and deaths recorded in these towns were 8,439 and 3,484 representing

birth and death rates of 39.7 and 16.4 per thousand of population respectively. The table at the end gives the position by States.

Sambhal in Utter Pradesh was the only town which had a high death rate of 75.1 per thousand of population and this high death rate was mainly due to deaths from fevers and respiratory diseases.

(B) States (Part B) :—The data here relate to 32 towns with an estimated population of 3,678 thousands. The total number of towns is 46 and their population is 5,350 thousands. Thus 70% of total number of towns representing 69% of total population is covered. The numbers of births and deaths recorded in these towns were 2,135 and 1,024 representing birth and death rates of 30.2 and 14.5 per thousand of population respectively.

No town recorded a high death rate of 50 or over per thousand of population.
